COMMUNITY REINVESTMENT ACT

Community Reinvestment Act

Under the federal Community Reinvestment Act ("CRA"), The Federal Deposit Insurance Corporation ("FDIC") evaluates our record of helping to meet the credit needs of this community consistent with safe and sound operations. The FDIC also takes this record into account when deciding on certain applications submitted by us.

Your involvement is encouraged.

You are entitled to certain information about our operations and our performance under the CRA, including, for example, information about our branches, such as their location and services provided at them; the public section of our most recent CRA Performance Evaluation, prepared by the FDIC and comments received from the public relating to our performance in helping to meet community credit need, as well as our responses to those comments. You may review this information today.

At least 30 days before the beginning of each quarter, the FDIC publishes a nationwide list of the banks that are scheduled for CRA examination in that quarter. This list is available from the Regional Director, FDIC, Division of Depositor and Consumer Protection, 300 South Riverside Plaza, Suite 1700, Chicago, Illinois 60606. You may send written comments about our performance in helping to meet community credit needs to our Compliance department at 1860 N Mannheim Road, Stone Park, Illinois 60165 and the FDIC Regional Director. You may submit comments electronically through the FDIC's website at www.fdic.gov/regulations/cra. Your letter, together with any response by us, will be considered by the FDIC in evaluating our CRA performance and may be made public.

You may ask to look at any comments received by the FDIC Regional Director. You may also request from the FDIC Regional Director an announcement of our applications covered by the CRA filed with the FDIC.

We are an affiliate of International Bancorp Inc., a bank holding company. You may request from the Officer in Charge of Supervision, Federal Reserve Bank of Chicago, 230 South LaSalle Street, Chicago, IL 60604, and any announcement of applications covered by the CRA filled by bank holding companies.

This document is an evaluation of this institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the institution. This evaluation is not, nor should it be construed as, an assessment of the financial condition of this institution. The rating assigned to this institution does not represent an analysis, conclusion, or opinion of the federal financial supervisory agency concerning the safety and soundness of this financial institution.

INSTITUTION RATING

INSTITUTION'S CRA RATING: This institution is rated **Satisfactory**.

An institution in this group has a satisfactory record of helping to meet the credit needs of its assessment area, including low- and moderate-income neighborhoods, in a manner consistent with its resources and capabilities.

The Lending Test is rated Satisfactory.

- The loan-to-deposit ratio is more than reasonable given the institution's size, financial condition, and assessment areas credit needs.
- A majority of home mortgage and small business loans are in the institution's assessment areas.
- The geographic distribution of home mortgage and small business loans reflects reasonable dispersion throughout the assessment areas.
- The distribution of borrowers reflects, given the demographics of the assessment areas, reasonable penetration among individuals of different income levels (including low- and moderate-income) and businesses of different sizes.
- The institution did not receive any CRA-related complaints since the prior evaluation; therefore, this factor did not affect the Lending Test rating.

The Community Development Test is rated Satisfactory.

- The institution's community development (CD) performance demonstrates adequate responsiveness to the CD needs in the assessment areas through CD loans, qualified investments, and CD services, as appropriate considering the institution's capacity and the need and availability of such opportunities for CD in the institution's assessment areas.

DESCRIPTION OF INSTITUTION

International Bank of Chicago (IBC) is chartered in Chicago, Illinois, and is a wholly owned subsidiary of IBC BCORP Inc., a one-bank holding company. IBC operates in Cook County, Illinois and Orange County, New York. The bank does not have any affiliates. IBC is a certified Community Development Financial Institution (CDFI) and Minority Depository Institution (MDI). The institution received a Satisfactory rating at its previous FDIC Performance dated August 12, 2019, based on Interagency Intermediate Small Bank (ISB) Examination Procedures.

IBC operates six full-service branches in its assessment areas with five in Illinois and one in New York. The Cook County, Illinois assessment area consists of branches located in low-income (2), moderate-income (1), middle-income (1), and upper-income (1) locations. The bank’s branch in Port Jervis, New York is in a moderate-income census tract. No branches have opened or closed since the previous evaluation. No merger or acquisition activities have occurred since the prior examination.

The bank offers loan products including commercial, home mortgage, and consumer loans. The bank’s primary line of business is commercial real estate and residential lending. IBC continues to offer a variety of deposit services including checking, savings, money market deposit accounts, and certificates of deposit. Alternative banking services include internet and mobile banking, electronic bill pay, and one bank-owned automated teller machine.

According to the June 30, 2022 Consolidated Reports of Condition and Income (Call Report), IBC reported \$872.8 million in total assets, \$673.1 million in total loans, \$775.6 in total deposits, and total securities of \$137.3 million. Since the previous evaluation, the increase in the loan portfolio is largely attributed to the origination of 1-4 family residential loans. The following table provides detailed information about the loan portfolio.

Loan Portfolio Distribution as of 06/30/2022		
Loan Category	\$(000s)	%
Construction and Land Development	36,712	5.5
Secured by Farmland	820	0.1
Secured by 1-4 Family Residential Properties	237,572	35.3
Secured by Multifamily (5 or more) Residential Properties	27,174	4.0
Secured by Nonfarm Nonresidential Properties	325,175	48.3
Total Real Estate Loans	627,453	93.2
Commercial and Industrial Loans	45,311	6.7
Agricultural Production and Other Loans to Farmers	0	0.0
Consumer Loans	249	0.0
Obligations of States and Political Subdivision in the Unites States	0	0.0
Other Loans	65	0.0
Unearned Income	0	0.0
Net Loans	673,078	100.0
<i>Source: Reports of Condition and Income; Due to rounding, percentages may not total 100.0.</i>		

In response to the economic impact on small businesses as a result of the Coronavirus Disease (COVID-19) pandemic, the SBA created the Paycheck Protection Program (PPP), a loan program designed to help small businesses maintain and compensate their workforces during the

crisis. IBC participated in the program to meet community financial needs and originated 959 PPP loans for \$41.7 million in 2020 and 1,689 loans for \$58.0 million in 2021.

Examiners did not identify any financial, legal, or other impediments that affect the bank’s ability to meet assessment area credit needs.

DESCRIPTION OF ASSESSMENT AREAS

The CRA requires each financial institution to define one or more assessment area within which its CRA performance will be evaluated. IBC has two designated assessment areas located throughout the states in which it operates, as summarized in the following table.

State	Metropolitan Statistical Area (MSA)/Metropolitan Division (MD)	Counties	Assessment Area Name
Illinois	Chicago-Naperville-Evanston MD	Cook	Illinois
New York	Poughkeepsie-Newburgh-Middletown MSA	Orange	New York

These assessment areas remain unchanged since the prior evaluation and do not arbitrarily exclude any low- or moderate-income (LMI) census tracts, do not reflect illegal discrimination, and otherwise meet the requirements of the CRA regulations.

IBC originated the largest percentage of its loans, attracted the largest percentage of dollar volume of deposits (as of June 30, 2022), and possessed the largest percentage of branches in the State of Illinois as depicted in the following table. As such, the State of Illinois received substantially more weight when drawing conclusions.

Assessment Area Name	% of # Loans in Assessment Area	% of \$ Deposits	% of # Branches
Illinois	65.2	97.7	83.3
New York	4.2	2.3	16.7

A more detailed discussion of each of the assessment areas, including economic and demographic data, competition, and community contacts, can be found in the separate assessment area sections of this evaluation.

SCOPE OF EVALUATION

General Information

This evaluation covers the period from the prior evaluation dated August 12, 2019, to the current evaluation dated November 14, 2022. Examiners used the ISB Examination Procedures to evaluate IBC’s CRA performance. These procedures include two tests: the Small Bank Lending Test and the CD Test. Refer to the Appendices for a description of these tests.

As described in more detail in the Description of Assessment Area section of this evaluation, IBC’s Illinois and New York assessment areas were evaluated using full-scope examination procedures, as IBC only maintains one assessment area in each state. Consistent with the higher

concentration of loans, deposits, and branches in the area, examiners will weigh the performance in the Illinois assessment area more significantly than the New York assessment area.

This evaluation includes an overall rating, a State of Illinois rating, and a State of New York rating, in accordance with Interstate Banking and Branching Efficiency Act. In accordance with Interagency CRA procedures, examiners must conduct a full-scope review on at least one assessment area in each state.

Activities Reviewed

The CRA Evaluation is based upon a review of home mortgage and small business loans. These two loan types are the primary business focus of the bank. Small farm, consumer, or any other loan types do not account for a significant portion of loans, thus they were not reviewed. The bank's record of originating home mortgage and small business loans contributed equal weight to overall conclusions given the bank's strategic focus and loan portfolio distribution.

Home mortgage loans consist of home purchase, home improvement, refinance, and multi-family loans reported pursuant to the Home Mortgage Disclosure Act (HMDA) requirements for 2019, 2020, and 2021. In 2019, IBC originated 117 mortgage loans totaling \$40.6 million; in 2020, 169 mortgage loans totaling \$60.8 million; and in 2021, 300 mortgage loans totaling \$101.2 million.

A review of the loan trial revealed IBC originated 45 small business loans totaling \$20.0 million in 2019; 85 small business loans totaling \$28.1 million and 959 PPP loans totaling \$41.7 million in 2020; and 101 small business loans totaling \$38.6 million and 1,689 PPP loans totaling \$58.0 million in 2021. Examiners reviewed the universe of these loans extended to evaluate the bank's performance within each part of the Lending Test except for the Borrower Profile analysis, as IBC is not subject to small business loans CRA reporting requirements. Examiners reviewed a sample of 69 small business loans originated in 2021 to collect business revenue information for the Borrower Profile analysis.

While examiners analyzed all three years (2019, 2020, and 2021) of home mortgage and small business loans, the Geographic Distribution and Borrower Profile analyses presented later in this evaluation depicts only 2021 data, as this activity was representative of the entire period. The 2021 HMDA aggregate mortgage data provided a standard of comparison for the bank's home mortgage lending performance. Demographic data from the U.S. Census 2015 ACS is used as additional measures of comparison for the bank's home mortgage. D&B data for 2021 provided a standard of comparison for small business loans.

For the Lending Test, examiners reviewed the number and dollar volume of home mortgage and small business loans. Examiners emphasized performance by number of loans, because the number of loans is a better indicator of the number of individuals and businesses served. Performance by dollar did not lead to different conclusions.

When determining the Lending Test rating, more weight was given to the Geographic Distribution of loans and Borrower Profile than loan-to-deposit ratio and assessment area

concentration. These two factors are more important because they most directly identify how well the bank serves the traditionally underserved segments of the population.

For the CD Test, bank management provided data on CD loans, qualified investments, and CD services since the prior CRA evaluation dated August 12, 2019. Prior period investments that remain on the bank’s books as of August 12, 2019 are also included.

Greater consideration was given in this evaluation to the bank’s lending and CD performance within the Illinois assessment area. This determination was based on discussions with management regarding banking strategies, as well as considerations for assessment area sizes, branch locations, lending activity, and credit and CD needs and available opportunities. The Illinois assessment area contains more banking offices, has a greater deposit base, and has more lending levels than the New York assessment area for both home mortgage and small business loans. This is supported by the assessment area descriptions and lending analyses in this evaluation.

CONCLUSIONS ON PERFORMANCE CRITERIA

LENDING TEST

IBC demonstrated reasonable performance under the Lending Test. Reasonable performance in each of the bank two-assessment areas’ credit needs. Geographic Distribution and Borrower Profile performance primarily support this conclusion.

Loan-to-Deposit Ratio

The bank’s loan-to-deposit is more than reasonable given the institution’s size, financial condition, and assessment area credit needs. The bank’s loan-to-deposit ratio, calculated from Call Report data, averaged 82.2 percent over the past twelve calendar quarters from September 30, 2019 to June 30, 2022. IBC’s ratio went from a high of 87.0 percent at June 30, 2022, to a low of 75.9 percent at December 31, 2019.

Loan-to-Deposit Ratio Comparison		
Bank	Total Assets as of 06/30/2022 (\$000s)	Average Net LTD Ratio (%)
International Bank of Chicago	872,772	82.2
Similarly-Situated Institution #1	1,047,869	58.4
Similarly-Situated Institution #2	554,982	56.5
Similarly-Situated Institution #3	494,433	72.3
Similarly-Situated Institution #4	765,528	71.5
Similarly-Situated Institution #5	1,232,506	81.4
<i>Source: Call Reports 09/30/2019 through 06/30/2022</i>		

Examiners compared the bank’s average loan-to-deposit ratio to five similarly situated banks (SIBs) based on asset size, geographic location, lending focus, and information from bank

management. The SSBs averaged a ratio of 68.0 percent ranging from a low of 56.5 to a high of 81.4 percent. IBC's ratio exceeded all of the SSBs.

Assessment Area Concentration

The bank originated a majority of its loans by both number and dollar volume within its assessment areas. The following table reflects the bank's HMDA home mortgage and small business loans inside and outside the assessment areas. The significant increase in small business loans in 2020 and 2021 attributed to the previously discussed PPP loans. These PPP loans exclude loans amounts greater than \$1 million.

Lending Inside and Outside of the AA										
Loan Category	Number of Loans				Total #	Dollar Amount of Loans \$(000s)				Total \$(000s)
	Inside		Outside			Inside		Outside

Sources: 2019, 2020, and 2021 HMDA data; 2019, 2020, and 2021 Bank Records

Geographic Distribution

The Geographic Distribution of loans reflects reasonable dispersion throughout the assessment areas. The bank's reasonable performance of home mortgage and small business lending in the Illinois assessment supports this conclusion. Examiners focused on the percentage by number of loans in LMI census tracts. Please refer to the comments in each assessment area for detailed discussion of the bank's performance under this portion of the Lending Test.

Borrower Profile

The distribution of borrowers reflects reasonable penetration among individuals of different incomes and businesses of different sizes within the assessment areas. The bank's reasonable performance of home mortgage and small business loans in the Illinois assessment area primarily supports this conclusion. Please refer to the separate conclusions under each assessment area for more information supporting the reasonable performance.

Innovative and Flexible Lending

The bank makes use of innovative and flexible lending to address the credit needs of LMI individuals or geographies and small businesses. The bank continues to offer the Micro Credit Program to individuals and small businesses. The program targets LMI individuals residing in the bank's primary service area, Chicago metropolitan with focus in Cook County and offers unsecured credit with a maximum loan amount of \$2,500 for individuals and \$5,000 for businesses. All individuals participating in the program must attend four sessions in financial counseling to learn the basic credit system in the U.S., personal financial statement preparation, personal/family budget, and the cash flow and debt service of a credit.

The bank has originated 78 consumer loans totaling \$195,000 via this program since the previous evaluation. In addition, bank employees have provided 540 hours of financial credit counseling via this program since the previous evaluation.

Response to Complaints

IBC did not receive any CRA-related complaints since the previous evaluation; therefore, this criterion did not affect the Lending Test rating.

COMMUNITY DEVELOPMENT TEST

An overall "Satisfactory" rating is assigned under the CD Test. IBC's CD performance demonstrates adequate responsiveness to CD needs in its assessment areas through CD loans, qualified investments, and CD services, as appropriate, considering the institution's capacity and the need and availability of such opportunities for CD in the institution's assessment areas. The conclusion is supported by adequate responsiveness in both assessment areas.

Community Development Loans

IBC originated 51 CD loans totaling \$80.3 million. This represents 13.9 percent of average net loans over the 12 quarters since the last examination, an increase from the prior evaluation when the bank reported 43 loans totaling \$50.4 million.

IBC's level of CD lending activity compares favorably to four SSBs that operate in the bank's assessment areas and have comparable loan portfolio concentrations and asset sizes. The CD lending activity of the four SSBs ranged from a low of 3.3 percent to a high of 9.6 percent of average net loans. All the SSBs received satisfactory ratings for CD on their most recent examination. The following table illustrates the bank's CD lending within the assessment areas.

Qualified Investments

IBC originated 30 qualified investments and donations totaling \$10.1 million. This represents 6.5 percent of average securities and 11.4 percent of average capital over the 12 quarters since the last examination. This level is moderately higher than the prior evaluation where IBC reported 13 qualified investments and donations totaling \$5.5 million.

The bank's level of qualified investment activity is comparable to four SSBs. The SSBs had qualified investments to average securities ranging from a low of less than one percent to a high of 16.6 percent, and average capital ratios ranging from a low of less than one percent to a high of 24.9 percent. The following table provides additional details regarding the bank's qualified investment and donation activities.

Community Development Services

Bank employees provided 165 instances of financial expertise or technical assistance to CD-related organizations totaling 1,140 hours during the evaluation period in the 12 quarters since the prior evaluation. This level is lower than the 254 instances at the prior examination. Examiners noted that the COVID-19 pandemic curtailed such services during the past 2.5 years. The majority of these CD services were related to the bank's Micro Credit Program targeted to LMI individuals in the assessment areas, with annual incomes of less than 80 percent of the medium family income (MFI). The community service component of this program includes a series of financial literacy workshops covering pre-credit financial counseling, credit report analysis, personal financial sessions, personal/family budget analysis, and post-credit follow-up counseling.

The bank's level of qualified community services activity compares favorably to four SSBs. The SSBs qualified community services ranged from a low of one service to a high of 180 services. IBC's CD services exceeded services of three SSBs. The following tables provide details on IBC's CD services in the assessment areas.

Community Development Services by Year

DISCRIMINATORY OR OTHER ILLEGAL CREDIT PRACTICES REVIEW

Examiners did not identify any evidence of discriminatory or other illegal credit practices; therefore, this consideration did not affect the institution's overall CRA rating.

STATE OF ILLINOIS – Full-Scope Review

CRA RATING FOR STATE OF ILLINOIS: SATISFACTORY

The Lending Test is rated: Satisfactory

The Community Development Test is rated: Satisfactory

DESCRIPTION OF INSTITUTION’S OPERATIONS IN ILLINOIS

The bank conducts a substantial majority of its operations and lending activities in the Illinois assessment area. Five of the six full-service offices are located in the Illinois assessment area. According to FDIC Deposit Market Share data as of June 30, 2022, 97.7 percent of the deposit base is derived from this assessment area. The full-service offices are located in the City of Chicago (2), the Village of Wilmette, the City of Des Plaines, and the Village of Stone Park. The bank’s main office and Chinatown branch are located in low-income census tracts. The branch located in Stone Park is in moderate-income census tract, the Des Plaines branch is in a middle-income census tract, and the Wilmette branch is in an upper-income census tract. The bank’s hours of operation provide reasonable access to banking services.

Economic and Demographic Data

The assessment area includes all 1,319 census tracts in Cook County. Examiners used demographic data from 2015 American Community Survey (ACS), compiled by the U.S. Census Bureau, and 2021 D&B Data, to analyze the bank’s CRA Performance. According to the 2015 ACS data, the assessment area’s census tracts reflect the following income designations: 253 (19.2 percent) low-income census tracts; 381 (28.9 percent) moderate-income tracts; 317 (24.0 percent) middle-income census tracts; 355 (26.9 percent) upper-income census tracts; and 13 (1.0 percent) census tracts with no income designation. The following table illustrates select demographic characteristics of the assessment area.

Demographic Information of the Assessment Area						
Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #
Geographies (Census Tracts)	1,319	19.2	28.9	24.0	26.9	1.0

<i>Source: 2015 ACS and 2021 D&B Data. Due to rounding, totals may not equal 100.0%; (*) The NA category consists of geographies that have not been assigned an income classification.</i>						

Housing units in the assessment area consist of 50.9 percent owner-occupied, 38.4 percent occupied rental units, and 10.7 percent vacant units. The bank's performance under the Geographic Distribution criterion compares home mortgage loans to the percentage of owner-occupied within geographies by income level. These characteristics provide some insight into the overall housing credit needs and demand in LMI geographies, which were considered when evaluating IBC's geographic lending patterns.

The median housing value of \$245,250 presents potential challenges to LMI individuals in qualifying for mortgages, as the MFI level is \$75,024. The LMI families account for 28.0 percent and 17.0 percent of the families in the assessment area, respectively, or 45.0 percent combined, with 13.2 percent of families below the poverty level. The bank's performance under the Borrower Profile criterion compares home mortgage loans to the percentage of families by income level. The owner-occupancy demographic coupled with the contrast between MFI levels and median housing values highlight some challenges that home mortgage lenders may face in providing financing to families on the lower end of the income spectrum.

Examiners used the 2021 FFIEC-updated median family income levels to analyze home mortgage loans in the borrow profile section. The following table illustrates the low-, moderate-, middle-, and upper-income categories for the assessment area.

Median Family Income Ranges				
Median Family Incomes	Low <50%	Moderate 50% to <80%	Middle 80% to <120%	Upper ≥120%
Chicago-Naperville-Evanston, IL Median Family Income (16984)				
2021 (\$87,100)	<\$43,550	\$43,550 to <\$69,680	\$69,680 to <\$104,520	≥\$104,520
<i>Source: FFIEC</i>				

The Chicagoland area maintains a strong commercial base with a high concentration of small businesses. According to 2021 D&B data, 474,429 non-farm businesses operate in the assessment area, of which 415,029 or 87.5 percent reported gross annual revenues (GARs) of \$1 million or less. The percentage of non-farm businesses with GARs of \$1 million or less in the assessment area indicates that opportunities exist to extend loans to small businesses.

Among all non-farm businesses, the services industry represents the largest segment of businesses in the assessment area at 36.9 percent, followed by finance, insurance and real estate (10.6 percent), retail trade (10.5 percent), transportation (5.1 percent) and construction (5.0 percent). In addition, 57.4 percent of businesses within the assessment area have four or fewer employees and 91.2 percent operate from a single location. This highlights the prevalence of small businesses within the assessment area. The analysis of small business loans under the Geographic Distribution criterion compares the loans to the percentage of businesses within geographies by income level, while the analysis under the Borrower Profile criterion compares the loans to the distribution of businesses by GAR level. D&B data for 2021 provides a standard of comparison when measuring small business lending performance.

The COVID-19 pandemic considerably affected local and global environments. The temporary closures of non-essential businesses that became effective in March 2020 caused significant

hardships for both individuals and businesses. The COVID-19 pandemic triggered dramatic increases in statewide and national unemployment rates. Throughout the majority of the review period, unemployment remained high and began improving in 2021. The average unemployment level in Cook County was higher than both the National and the State unemployment average. The following table outlines the unemployment rates.

Unemployment Rates			
	2019	2020	2021
Area	%	%	%
Cook County, Illinois	3.9	10.4	7.1
State of Illinois	4.0	9.2	6.1
National Average	3.7	8.1	5.4
<i>Source: Bureau of Labor Statistics</i>			

Competition

The assessment area is a highly competitive market. According to the FDIC’s Summary of Deposit report as of June 30, 2022, 100 financial institutions operated 1,193 offices within Cook County. Of these institutions, IBC ranked 32nd with 0.2 percent market share.

A high level of competition for home mortgage loans among several banks, credit unions, and non-depository mortgage lenders exist in the assessment area. In 2021, 814 lenders reported 241,306 residential mortgage loans originated or purchased. IBC ranked 123rd out of the group of lenders with a market share of .08 percent. The six most prominent home mortgage lenders accounted for approximately 32.7 percent of total market share.

IBC is not required to collect or report its small business lending data, and it has not elected to do so. Therefore, the analysis of small business loans under the Lending Test does not include comparisons against aggregate data. The aggregate data, however, reflects the level of demand for small business loans and is, therefore, included. Aggregate data for 2020 indicates 328 lenders reported 169,317 small business loans in the assessment area. The five most prominent small business lenders accounted for 50.6 percent of total market share. Aggregate data for 2021 is not available during this evaluation.

Community Contacts

As part of the evaluation process, examiners contact third parties active in the assessment area to assist in identifying credit and CD needs. This information helps determine whether local financial institutions are responsive to these needs. It also shows what credit and CD opportunities are available. Examiners reviewed two recent contacts with community-based organizations within the assessment area. The contacts included an economic development organization focusing on small businesses and an economic council focusing on financial literacy for youth ages 3 - 24. The contacts identified needs for small business lending, start-up capital, and bank products geared toward youth in LMI neighborhoods. The contact further noted that bank products for youth in LMI neighborhoods should have no overdraft opt-ins, opened with zero balance with direct deposit, no regular fees, and maximum \$25 minimum balance. The

contacts indicated that area banks have been somewhat responsive but increased commitments would be useful.

Credit and Community Development Needs and Opportunities

Considering the information from the community contacts, demographic data, and discussions with bank management, examiners determined that CD needs in the assessment area include affordable housing, small business lending, and financial literacy. The relatively high level of LMI families, along with the percentage of businesses with revenues of \$1 million or less, supports these needs.

The Illinois assessment area provides numerous opportunities for involvement in CD activities. The Chicago metropolitan area contains empowerment zones and tax increment financing districts designated by local or state government entities for revitalization, stabilization, or economic development. These areas are established to stimulate economic activities that include job preservation, job creation, business development, and residential development. Additionally, the State of Illinois and local community organizations sponsor various programs to support affordable housing and economic development.

SCOPE OF EVALUATION - ILLINOIS

The scope of the evaluation of the bank's performance in the Illinois assessment area is consistent with the overall scope described earlier for the entire institution. Examiners reviewed the bank's 2021 home mortgage and small business loans, and applicable CD loans, qualified investments, and CD services since the previous evaluation dated August 12, 2019. The bank's assessment area in the State of Illinois (referred to as the Illinois assessment area) is based upon the full-scope evaluation of the bank's performance. The assessment area includes all of Cook County, which is located within the Chicago-Naperville-Arlington Heights, IL MD.

CONCLUSIONS ON PERFORMANCE CRITERIA IN ILLINOIS

LENDING TEST

The bank's lending performance reflects reasonable responsiveness to the credit needs in the Illinois assessment area. Reasonable Geographic Distribution and Borrower Profile performance support this conclusion.

Geographic Distribution

The Geographic Distribution of loans reflects reasonable dispersion throughout the Illinois assessment area. The conclusion is supported by excellent performance in home mortgage lending and reasonable performance in small business lending.

Home Mortgage Loans

The Geographic Distribution of loans reflects excellent dispersion throughout the Illinois assessment area. The bank's excellent performance in both LMI income tracts supports this conclusion. Examiners compared IBC's performance to 2021 HMDA aggregate data, as well as the percentage of housing units. When drawing conclusions, examiners placed substantially more weight on the comparison to aggregate, as it is a better measure of lending opportunities in the assessment area as it represents the performance of all lenders. The following table provides details.

Geographic Distribution of Home Mortgage Loans - Illinois Assessment Area						
Tract Income Level	% of Owner Occupied Housing Units	Aggregate Performance % of #	#	%	\$(000s)	%
Low						
2021	6.9	5.4	42	20.0	13,253	17.8
Moderate						
2021	24.2	19.3	92	43.8	28,848	38.8

Source: 2015 ACS; HMDA Data, 2021 HMDA Aggregate Data, "--" data not available. Due to rounding, totals may not equal 100.0%

IBC's record of granting loans to finance home mortgage loans in LMI census tracts is excellent. As reflected in the above table, the bank's 2021 lending significantly exceeded aggregate data in LMI census tracts. IBC's performance in low-income census tracts exceeded aggregate performance by 14.6 percentage points. The bank's performance in moderate-income census tracts exceeded aggregate performance by 24.5 percentage points, reflecting excellent performance.

Small Business Loans

The Geographic Distribution of small business loans reflects reasonable dispersion throughout the assessment area. Performance is compared to the location of businesses by census tract income level (demographic). The following table reflects the distribution of small business loans by census tract income level.

Geographic Distribution of Small Business Loans - Illinois Assessment Area						
Tract Income Level	% of Businesses	#	%	\$(000s)	%	
Low						
2021	8.6	215	18.9	8,420	13.8

The bank’s performance in low-income census tracts exceeded the demographic by 10.3 percentage points and 4.9 percentage points in moderate-income census tracts, reflecting reasonable dispersion.

Borrower Profile

The distribution of borrowers reflects, given the demographics of the assessment area, reasonable penetration among individuals of different income levels (including LMI) and businesses of different sizes. This conclusion is supported by reasonable home mortgage and small business performance.

Home Mortgage Loans

The distribution of loans to borrowers reflects reasonable penetration among individuals of different income levels. Examiners assessed IBC’s performance against aggregate data and the percentage of families (demographic) within the assessment area. The following table reflects the distribution of home mortgage loans by borrower income level.

Distribution of Home Mortgage Loans by Borrower Income Level - Illinois Assessment Area						
Borrower Income Level	% of Families	Aggregate Performance % of #	#	%	\$(000s)	%
Low						
2021	28.0	5.9	11	5.2	2,351	3.2

Source: 2015 ACS; HMDA Data, 2021 HMDA Aggregate Data, "--" data not available. Due to rounding, totals may not equal 100.0%.

The bank’s performance to low-income borrowers slightly trails aggregate data and trailed the demographic. However, the assessment area consists of 13.2 percent families living below the poverty level. These families likely face difficulties in qualifying for home mortgage due to financial constraints. When adjusting for the poverty level factor, the bank’s overall performance is reasonable.

The bank’s performance to moderate-income borrowers exceeded aggregate data and the demographic in 2021. IBC’s performance to both LMI borrowers throughout the review period demonstrates an overall reasonable borrower distribution.

Small Business Loans

The distribution of small business loans reflects reasonable penetration of loans to businesses of different sizes. Examiners focused on the percentage by number of small business loans to businesses with GARs of \$1 million or less (demographic) in the assessment area. The following table reflects the distribution of small business loans by revenue level.

Distribution of Small Business Loans by Gross Annual Revenue Category - Illinois Assessment Area					
Gross Revenue Level	% of Businesses	#	%	\$(000s)	%
<=\$1,000,000					
2021	87.5	15	51.7	4,809	36.9
>\$1,000,000					
2021	4.7	13	44.8	7,550	58.0
Revenue Not Available					
2021	7.8	1	3.4	658	5.1
Totals					
2021	100.0	29	100.0	13,017	100.0
<i>Source: 2021 D&B Data; Bank Data; "--" data not available. Due to rounding, totals may not equal 100.0%.</i>					

The bank’s performance significantly trailed the demographic; the demographic represents all businesses in the area, not just those seeking traditional bank financing. It is important to note that demographic data does not necessarily represent an accurate picture of demand. Many smaller businesses seek credit through other means such as credit cards, home equity loans, or financing through non-bank sources to fund their businesses.

Additionally, IBC’s lending to businesses of different sizes is comparable to five SSBs that operate in the bank’s assessment area and have comparable loan portfolio concentrations and asset sizes. The five SSBs performance ranged from 39.2 percent to 54.5 percent. As a result, the loan distribution reflects reasonable performance and a willingness to make loans to businesses of different sizes.

Innovative and Flexible Lending

IBC continues to offer the Micro Credit Program and originated 35 micro credit loans for \$87,500 in the assessment area during the evaluation period. The bank’s Micro Credit Program further supports its willingness to serve the credit needs of the assessment area.

COMMUNITY DEVELOPMENT TEST

IBC demonstrated adequate responsiveness to the CD needs of the Illinois assessment area through qualified CD loans, investments, and services. Examiners considered the institution’s capacity and the need and availability of such opportunities. The bank’s CD activities were evaluated for the evaluation period from August 12, 2019 to November 14, 2022. The CD performance is generally consistent with the performance of similar banks in the assessment area that were evaluated utilizing ISB Examination Procedures.

Community Development Loans

CD lending increased since the previous examination, as IBC originated 48 CD loans totaling \$78.7 million within the Illinois assessment area during the review period. This activity represents 97.9 percent of the bank’s total qualified lending activity by dollar volume.

IBC’s CD lending by dollar volume compares favorably to the performance of four SSBs, as these SSBs’ CD loans by dollar volume ranged between \$13.8 and \$28.7 million. The following table details IBC’s CD lending by year and purpose.

Community Development Lending – Illinois Assessment Area										
Activity Year	Affordable Housing		Community Services		Economic Development		Revitalize or Stabilize		Totals	
	#	\$(000s)	#	\$(000s)	#	\$(000s)	#	\$(000s)	#	\$(000s)

Total	11	18,021	1	315	3	1,291	33	59,091	48	78,718

Source: Bank Records

Thirty-three of the CD loans totaling \$59.1 million were for revitalization of stabilization of the assessment area. Notable examples of the bank’s CD loans include:

- A \$1.5 million loan to acquire a local business in a moderate-income census tract to help support and revitalize the neighborhood.
- A \$3.1 million loan to acquire and rehab a 31-unit apartment building. The property is in a moderate-income tract and the units will lease at rates affordable to LMI families.
- A \$1.3 million SBA 7A loan to purchase a motel in a moderate-income census tract and promote economic development in the area.

Qualified Investments

IBC made approximately \$8.2 million in qualified investments and \$15,000 in qualified donations during the evaluation period. Investments during the review period include \$7.6

million in new funds and one prior period CD investment for \$662,000. This level of investment represents 81.5 percent of the bank’s total qualified investment activity by dollar volume. This level of investment exceeds the previous evaluation, when the bank received credit for \$5.5 million in qualified investments.

IBC’s CD lending by dollar is comparable to the performance of four SSBs, as these SSBs’ CD investment by dollar volume ranged between \$2.4 and \$40.1 million. The following table details IBC’s CD investments by year and purpose.

Qualified Investments – Illinois Assessment Area										
Activity Year	Affordable Housing		Community Services		Economic Development		Revitalize or Stabilize		Totals	
	#	\$(000s)	#	\$(000s)	#	\$(000s)	#	\$(000s)	#	\$(000s)

<i>Source: Bank Records</i>										

Notable examples of the bank’s qualified investment activities include:

- In 2019, the bank purchased two municipal bonds for two schools in Cook County where the student base is over 50 percent LMI based on free or reduced lunch statistics from the State of Illinois.
- In 2020, the bank invested \$1.3 million in the CRA Qualified Investment Fund and earmarked the funds for moderate-income census tracts in Cook County Illinois.
- In 2021, the bank purchased \$4.6 million in mortgage-backed securities for LMI families in Cook County Illinois.

Community Development Services

During the evaluation period, bank employees provided 118 CD services totaling 765 hours. The majority of the hours related to the bank’s Micro Credit Program that targeted LMI individuals in the assessment area. The program includes a series of financial literacy workshops addressing pre-credit financial counseling, credit report analysis, personal financial sessions, personal/family budget analysis, and post-credit follow-up counseling. The bank’s overall CD services decreased from 168 during the previous examination as many organizations shut down for a time-period during the COVID-19 pandemic for the past 2.5 years. Examiners noted that the number of hours at 765 during the current examination is up from 673.2 hours noted in 2019. The following table details the number of services and hours.

Community Development Services – Illinois Assessment Area										
Activity Year	Affordable Housing		Community Services		Economic Development		Revitalize or Stabilize		Totals	
	#	Hours	#	Hours	#	Hours	#	Hours	#	Hours
2019 (August – Dec)	0	0	16	159	0	0	0	0	16	159

<i>Source: Bank Records</i>										

Notable examples of CD services include:

- Bank employee is a Board member of a not-for-profit organization and provides financial expertise to local cities in moderate-income census tracts.
- A bank employee provided a financial literacy workshop for LMI high school students located in a moderate-income census tract.
- A bank employee is a Board member and provides financial expertise to a local non-profit agency that assists immigrants and low-income residents and communities in Chicago.

NEW YORK ASSESSMENT AREA – Full Scope Review

CRA RATING FOR NEW YORK: Satisfactory

The Lending Test is rated: Satisfactory

The Community Development Test is rated: Satisfactory

DESCRIPTION OF INSTITUTION’S OPERATIONS IN NEW YORK

IBC continues to maintain one of its six full-service offices in Port Jervis, New York. Port Jervis has a population of 8,754 residents. According to FDIC Deposit Market Share data as of June 30, 2022, 2.3 percent of the deposit base is derived from this assessment area. The Port Jervis branch does not have personnel to grant loans. Port Jervis personnel take loan applications and forward them to IBC’s headquarters in Chicago for review. Loan processing, credit underwriting, and loan administration for all Port Jervis loans are centralized in Chicago.

The Port Jervis branch is in a moderate-income census tract and borders four other moderate-income census tract in the assessment area. The branch is located approximately 14 miles from the nearest low-income census tract. Examiners noted that four branches of national financial institutions are located inside these moderate-income census tracts and one branch immediately outside a concentration of moderate-income census tracts.

Economic and Demographic Data

The assessment area includes all 79 census tracts in Orange County. Examiners used demographic data from 2015 ACS and 2021 D&B Data, to analyze the bank’s CRA Performance. According to the 2015 ACS data, the assessment area’s census tracts reflect the following income designations: 9 (11.4 percent) low-income census tracts; 14 (17.7 percent) moderate-income tracts; 37 (46.8 percent) middle-income tracts; and 19 (24.1 percent) upper-income tracts. The following table illustrates select demographic of the assessment area.

Demographic Information of the Assessment Area						
Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #
Geographies (Census Tracts)	79	11.4	17.7	46.8	24.1	0.0

Household Distribution by Income Level	125,270	22.0	13.3	16.2	48.5	0.0
Median Family Income MSA - 39100 Poughkeepsie-Newburgh-Middletown, NY MSA		\$85,780	Median Housing Value			\$255,603
Families Below Poverty Level		9.3%	Median Gross Rent			\$1,198
<i>Source: 2015 ACS and 2021 D&B Data. Due to rounding, totals may not equal 100.0%; (*) The NA category consists of geographies that have not been assigned an income classification.</i>						

Housing units in the assessment area consist of 61.9 percent owner-occupied, 28.1 percent occupied rental units, and 9.9 percent vacant units. The bank's performance under the Geographic Distribution criterion compares home mortgage loans to the percentage of owner-occupied housing units within geographies by income level. These characteristics provide some insight into the overall housing credit needs and demand in LMI geographies, which were considered when evaluating IBC's geographic lending patterns.

The median housing value of \$255,603 presents potential challenges to LMI individuals in qualifying for mortgages, as the median family income level is \$85,780. The LMI families account for 18.3 percent and 13.6 percent of the families in the assessment area, respectively, or 31.9 percent combined, with 9.3 percent of families below the poverty level. The bank's performance under the Borrower Profile criterion compares home mortgage loans to the percentage of families by income level. The owner-occupancy demographic coupled with the contrast between MFI levels and median housing values highlight some challenges that home mortgage lenders may face in providing financing to families on the lower end of the income spectrum.

Examiners used the 2021 FFIEC-updated MFI levels to analyze home mortgage loans in the borrow profile section. The following table illustrates the low-, moderate-, middle-, and upper-income categories for the assessment area.

Median Family Income Ranges				
Median Family Incomes	Low <50%	Moderate 50% to <80%	Middle 80% to <120%	Upper ≥120%
Poughkeepsie-Newburgh-Middletown, NY MSA Median Family Income (39100)				
2021 (\$99,900)	<\$49,950	\$49,950 to <\$79,920	\$79,920 to <\$119,880	≥\$119,880
<i>Source: FFIEC</i>				

According to 2021 D&B data, 40,360 non-farm businesses operate in the assessment area, of which 35,963 or 89.1 percent reported GARs of \$1 million or less. The percentage of non-farm businesses with GARs of \$1 million or less in the assessment area indicates that opportunities exist to extend loans to small businesses.

Among all non-farm businesses, the services industry represents the largest segment of businesses in the assessment area at 33.9 percent, followed by retail trade (12.3 percent), finance, insurance and real estate (8.5 percent), and construction (7.6 percent). In addition, 61.5 percent of businesses within the assessment area have four or fewer employees and 93.0 percent operate from a single location. This highlights the prevalence of small businesses within the assessment area. The analysis of small business loans under the Geographic Distribution criterion compares the loans to the percentage of businesses within geographies by income level, while the analysis under the Borrower Profile criterion compares the loans to the distribution of businesses by GAR level. D&B data for 2021 provides a standard of comparison when measuring small business lending performance.

The COVID-19 pandemic considerably affected local and global environments. The temporary closures of non-essential businesses that became effective in March 2020 caused significant

hardships for both individuals and businesses. The COVID-19 pandemic triggered dramatic increases in statewide and national unemployment rates. Throughout the majority of the review period, unemployment remained high and began improving in 2021. The following table outlines the unemployment rates.

Unemployment Rates			
	2019	2020	2021
Area	%	%	%
Orange County, New York	3.6	8.0	4.7
State of New York	3.8	9.9	7.0
National Average	3.7	8.1	5.4
<i>Source: Bureau of Labor Statistics</i>			

Competition

The assessment area is moderately competitive in the market for financial services. According to the FDIC’s Summary of Deposit report as of June 30, 2022, 23 financial institutions operated 95 offices within Orange County. Of these institutions, IBC ranked 23rd with 0.2 percent market share.

A moderate level of competition for home mortgage loans among several banks, credit unions, and non-depository mortgage lenders exist in the assessment area. In 2021, 295 lenders reported 15,767 residential mortgage loans originated or purchased. IBC ranked 129th out of this group of lenders with a market share of .04 percent. The five most prominent home mortgage lenders accounted for 31.1 percent of total market share.

IBC is not required to collect or report its small business lending data, and it has not elected to do so. Therefore, the analysis of small business loans under the Lending Test does not include comparisons against aggregate data. The aggregate data, however, reflects the level of demand for small business loans and is, therefore, included. Aggregate data for 2020 indicates 126 lenders reported 11,552 small business loans in the assessment area. The five most prominent small business lenders accounted for 53.1 percent of total market share. Aggregate data for 2021 is not available during this evaluation.

Community Contacts

As part of the evaluation process, examiners contact third parties active in the assessment area to assist in identifying the credit and CD needs. This information helps determine whether local financial institutions are responsive to these needs. It also shows what credit and CD opportunities are available. Examiners reviewed two recently conducted community contacts in the area. One contact indicated a need for affordable housing and small business loans. Another contact stated there is a need for affordable housing as the current stock is terrible. The contact further stated that the primary need is for LMI families to have access to more low-income housing units. The contact stated that financial institutions should make more resources available to LMI individuals and families.

Credit and Community Development Needs and Opportunities

Considering information from the recent community contacts, and demographic and economic data, examiners determined that home mortgage loans and small business loans represent primary credit needs in the assessment area.

SCOPE OF EVALUATION – NEW YORK

Examiners conducted a full scope review of the New York assessment area. The scope of the evaluation of the bank's performance in the State of New York is consistent with the overall scope described earlier for the entire institution. Examiners reviewed the bank's 2021 home mortgage and small business loans, and applicable CD loans, qualified investments, and CD services since the previous evaluation dated August 12, 2019.

CONCLUSIONS ON PERFORMANCE CRITERIA IN THE NEW YORK

LENDING TEST

IBC demonstrated overall reasonable performance under the Lending Test in the New York assessment area. During the review period, the bank funded 12 home mortgage loans totaling approximately \$2.6 million and 136 small business loans totaling \$3.4 million in the assessment area. This accounts for 2.2 percent of total home mortgage and small business lending in its markets, which is consistent with the level of deposit (2.3 percent) in the assessment area.

Geographic Distribution

Overall, the Geographic Distribution of loans reflects reasonable dispersion throughout the assessment area. As noted previously, the closest low-income census tract to the bank's only location is 14 miles away. Therefore, more weight was placed on IBC's performance in moderate-income census tracts where the sole office is located. The conclusion is supported by reasonable performance in home mortgage lending and small business lending.

Home Mortgage Loans

The Geographic Distribution of loans reflects reasonable dispersion throughout the New York assessment area. Performance is measured against aggregate data and the percentage of owner-occupied housing units (demographic) within each census tract level. The following table reflects the distribution of small business loans by census tract income level.

Geographic Distribution of Home Mortgage Loans – New York AA						
Tract Income Level	% of Owner Occupied Housing Units	Aggregate Performance % of #	#	%	\$(000s)	%
Low						
2021	3.4	8.4	0	0.0	0	0.0
Moderate						
2021	12.5	9.6	5	71.4	1,296	73.0

2021	0.0	0.0	0	0.0	0	0.0
Totals						
2021	100.0	100.0	7	100.0	1,775	100.0
<i>Source: 2015 ACS; HMDA Data, 2021 HMDA Aggregate Data, "--" data not available. Due to rounding, totals may not equal 100.0%.</i>						

While the bank originated no loans in low-income census tracts, it originated five loans in moderate-income census tracts exceeding aggregate data. Although the volume of loans is low, this is a moderate improvement since the previous evaluation when only one loan was originated in a low-income census tract and one in a moderate-income census tract.

Small Business Loans

Overall, the Geographic Distribution of small business loans reflects reasonable dispersion throughout the assessment area. Performance is compared to the location of businesses by census tract income level (demographic) in the assessment area. The following table reflects the distribution of small business loans by census tract income level.

Geographic Distribution of Small Business Loans - New York Assessment Area					
Tract Income Level	% of Businesses	#	%	\$(000s)	%
Low					
2021	15.0	2	1.9	10	0.4
Moderate					
2021	12.6	66	61.7	2,102	85.7
Middle					
2021	44.9	33	30.8	215	8.8
Upper					
2021	27.5	6	5.6	126	5.1
Not Available					
2021	0	0	0.0	0	0.0
Totals					
2021	100.0	107	100.0	2,453	100.0
<i>Source: 2021 D&B Data; Bank Data; "--" data not available. Due to rounding, totals may not equal 100.0%.</i>					

The bank’s performance in low-income census tracts is significantly below the demographic, reflecting poor performance. While the bank’s performance in moderate-income census tracts exceeded the demographic by 49.1 percent, reflecting excellent performance; therefore, the bank’s overall performance is reasonable.

Borrower Profile

Overall, the distribution of home mortgage and small business loans reflects reasonable penetration. The distribution of borrowers reflects poor penetration among individuals of different income levels for residential loans; while it reflects reasonable penetration among businesses of different sizes.

Home Mortgage Loans

The distribution of home mortgage loans to individuals of different income levels, including LMI borrowers, reflects poor penetration throughout the assessment area. The following table demonstrates the distribution of home mortgage loans by borrower income level.

Distribution of Home Mortgage Loans by Borrower Income Level- New York Assessment Area						
Borrower Income Level	% of Families	Aggregate Performance % of #	#	%	\$(000s)	%
Low						
2021	18.3	5.0	0	0.0	0	0.0

<i>Source: 2015 ACS; HMDA Data, 2021 HMDA Aggregate Data, "--" data not available. Due to rounding, totals may not equal 100.0%.</i>						

No residential loans were originated to low-income borrowers and only two residential loans were originated to moderate-income borrowers. While the bank’s performance to moderate-income borrowers exceeded both aggregate and demographic data, overall performance is poor when considering no loans originated to low-income borrowers.

Small Business Loans

The distribution of loans to businesses of different sizes reflects reasonable penetration. Examiners focused on the bank’s lending to businesses with \$1 million or less in GARs. The following table provides details:

Distribution of Small Business Loans by Gross Annual Revenue Category - New York Assessment Area					
Gross Revenue Level	% of Businesses	#	%	\$(000s)	%
<=\$1,000,000					
2021	89.1	3	100.0	945	100.0
>\$1,000,000					
2021	3.2	0	0	0	0
Revenue Not Available					
2021	7.7	0	0	0	0
Totals					
2021	100.0	3	100.0	945	100.0
<i>Source: 2021 D&B Data; Bank Data; "--" data not available. Due to rounding, totals may not equal 100.0%.</i>					

The bank's performance exceeded the percentage of businesses with GAR of \$1 million or less. As a result, the loan distribution reflects reasonable performance and a willingness to make loans to businesses of different sizes.

Innovative and Flexible Lending

IBC continues to offer the Micro Credit Program and originated 43 micro credit loans for \$107,500 in the assessment area during the evaluation period. The bank's Micro Credit Program further supports its willingness to serve the credit needs of the assessment area.

COMMUNITY DEVELOPMENT TEST

IBC demonstrated an adequate responsiveness to the CD needs of the New York assessment area through CD loans, qualified investments, and CD services. Examiners considered the bank's capacity and the need and availability of such opportunities within the assessment area.

Community Development Loans

The bank did not originate any CD loans in the assessment area during the evaluation period. However, IBC originated three CD loans totaling \$1.6 million that benefited a broader regional area within the Poughkeepsie-Newburgh-Middletown MSA, which includes the bank's New York assessment area. The loans were for the purpose of economic development and job creation and retention for LMI individuals at a printing facility in Wayne, New Jersey. While not allocated to a specific assessment area, such loans meet the definition of CD, and displayed responsive to the credit needs of borrowers in this assessment area.

Qualified Investments

The bank held one investment in the assessment area totaling approximately \$1.7 million during the evaluation period. This investment in the Community Reinvestment Act Qualified Investment Fund has a primary purpose of CD by identifying and purchasing securities that support affordable housing in the assessment area. The bank also purchased three municipal

school bonds totaling \$206,000 in districts that support LMI students based on reduced or free lunches. The following table provides information regarding the number and volume of CD investments.

Qualified Investments – New York Assessment Area

Source: Bank Records

Community Development Services

The bank provided 47 CD services, totaling 375 hours, benefitting the assessment area. The majority of services involved financial literacy workshops regarding the bank’s small dollar Micro Credit Program. As previously noted, the program extends unsecured credit to qualified individuals within the assessment area, it includes several workshops covering pre-credit financial counseling, credit report analysis, personal financial analysis, personal/family budget analysis, and post-credit follow-up counseling. The level of activity decreased since the previous evaluation, but this was mainly due to many entities were shut down for prolonged periods during the COVID-19 pandemic. Examiners noted an increase in service hours since the previous evaluation during this same period. The following table illustrates information on the number of services and hours provided in the assessment area.

Community Development Services – New York Assessment Area										
Activity Year	Affordable Housing		Community Services		Economic Development		Revitalize or Stabilize		Totals	
	#	Hours	#	Hours	#	Hours	#	Hours	#	Hours
2019 (August – Dec)	0	0	13	79	0	0	0	0	13	79
2020	0	0	14	82	0	0	0	0	14	82
2021	0	0	10	114	0	0	0	0	10	114

Total	0	0	47	375	0	0	0	0	47	375

Source: Bank Records

Notable examples of the bank’s CD services include:

- Bank employees provided a financial literacy workshop during a fall festival.
- Bank employees provided 300 hours of financial credit counseling services under the Micro Credit Program to residents in the assessment area.

INTERMEDIATE SMALL BANK PERFORMANCE CRITERIA

Lending Test

The Lending Test evaluates the bank's record of helping to meet the credit needs of its assessment area(s) by considering the following criteria:

- 1) The bank's loan-to-deposit ratio, adjusted for seasonal variation, and, as appropriate, other lending-related activities, such as loan originations for sale to the secondary markets, community development loans, or qualified investments;
- 2) The percentage of loans, and as appropriate, other lending-related activities located in the bank's assessment area(s);
- 3) The geographic distribution of the bank's loans;
- 4) The bank's record of lending to and, as appropriate, engaging in other lending-related activities for borrowers of different income levels and businesses and farms of different sizes; and
- 5) The bank's record of taking action, if warranted, in response to written complaints about its performance in helping to meet credit needs in its assessment area(s).

Community Development Test

The Community Development Test considers the following criteria:

- 1) The number and amount of community development loans;
- 2) The number and amount of qualified investments;
- 3) The extent to which the bank provides community development services; and
- 4) The bank's responsiveness through such activities to community development lending, investment, and service needs.

SUMMARY OF RATINGS FOR RATED AREAS

Rated Area	Lending Test	Community Development Test	Rating
Illinois Assessment Area	Satisfactory	Satisfactory	Satisfactory
New York Assessment Area	Satisfactory	Satisfactory	Satisfactory

GLOSSARY

Aggregate Lending: The number of loans originated and purchased by all reporting lenders in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

American Community Survey (ACS): A nationwide United States Census survey that produces demographic, social, housing, and economic estimates in the form of five year estimates based on population thresholds.

Area Median Income: The median family income for the MSA, if a person or geography is located in an MSA; or the statewide nonmetropolitan median family income, if a person or geography is located outside an MSA.

Assessment Area: A geographic area delineated by the bank under the requirements of the Community Reinvestment Act.

Census Tract: A small, relatively permanent statistical subdivision of a county or equivalent entity. The primary purpose of census tracts is to provide a stable set of geographic units for the presentation of statistical data. Census tracts generally have a population size between 1,200 and 8,000 people, with an optimum size of 4,000 people. Census tract boundaries generally follow visible and identifiable features, but they may follow nonvisible legal boundaries in some instances. State and county boundaries always are census tract boundaries.

Combined Statistical Area (CSA): A combination of several adjacent metropolitan statistical areas or micropolitan statistical areas or a mix of the two, which are linked by economic ties.

Community Development: For loans, investments, and services to qualify as community development activities, their primary purpose must:

- (1) Support affordable housing for low- and moderate-income individuals;
- (2) Target community services toward low- and moderate-income individuals;
- (3) Promote economic development by financing small businesses or farms; or
- (4) Provide activities that revitalize or stabilize low- and moderate-income geographies, designated disaster areas, or distressed or underserved nonmetropolitan middle-income geographies.

Community Development Corporation (CDC): A CDC allows banks and holding companies to make equity type of investments in community development projects. Bank CDCs can develop innovative debt instruments or provide near-equity investments tailored to the development needs of the community. Bank CDCs are also tailored to their financial and marketing needs. A CDC may purchase, own, rehabilitate, construct, manage, and sell real property. Also, it may make equity or debt investments in development projects and in local businesses. The CDC activities are expected to directly benefit low- and moderate-income groups, and the investment dollars should not represent an undue risk on the banking organization.

Community Development Financial Institutions (CDFIs): CDFIs are private intermediaries (either for profit or nonprofit) with community development as their primary mission. A CDFI facilitates the flow of lending and investment capital into distressed communities and to individuals who have been unable to take advantage of the services offered by traditional financial institutions. Some basic types of CDFIs include community development banks, community development loan funds, community development credit unions, micro enterprise funds, and community development venture capital funds.

A certified CDFI must meet eligibility requirements. These requirements include the following:

- Having a primary mission of promoting community development;
- Serving an investment area or target population;
- Providing development services;
- Maintaining accountability to residents of its investment area or targeted population through representation on its governing board of directors, or by other means;
- Not constituting an agency or instrumentality of the United States, of any state or political subdivision of a state.

Community Development Loan: A loan that:

- (1) Has as its primary purpose community development; and
- (2) Except in the case of a wholesale or limited purpose bank:
 - (i) Has not been reported or collected by the bank or an affiliate for consideration in the bank's assessment area as a home mortgage, small business, small farm, or consumer loan, unless it is a multifamily dwelling loan (as described in Appendix A to Part 203 of this title); and
 - (ii) Benefits the bank's assessment area(s) or a broader statewide or regional area including the bank's assessment area(s).

Community Development Service: A service that:

- (1) Has as its primary purpose community development;
- (2) Is related to the provision of financial services; and
- (3) Has not been considered in the evaluation of the bank's retail banking services under § 345.24(d).

Consumer Loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, home equity loans, other secured consumer loans, and other unsecured consumer loans.

Core Based Statistical Area (CBSA): The county or counties or equivalent entities associated with at least one core (urbanized area or urban cluster) of at least 10,000 population, plus adjacent counties having a high degree of social and economic integration with the core as measured through commuting ties with the counties associated with the core. Metropolitan and Micropolitan Statistical Areas are the two categories of CBSAs.

Distressed Middle-Income Nonmetropolitan Geographies: A nonmetropolitan middle-income geography will be designated as distressed if it is in a county that meets one or more of the following triggers:

- (1) An unemployment rate of at least 1.5 times the national average;
- (2) A poverty rate of 20 percent or more; or
- (3) A population loss of 10 percent or more between the previous and most recent decennial census or a net migration loss of 5 percent or more over the 5-year period preceding the most recent census.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married-couple family or other family. Other family is further classified into “male householder” (a family with a male householder and no wife present) or “female householder” (a family with a female householder and no husband present).

FFIEC-Estimated Income Data: The Federal Financial Institutions Examination Council (FFIEC) issues annual estimates which update median family income from the metropolitan and nonmetropolitan areas. The FFIEC uses American Community Survey data and factors in information from other sources to arrive at an annual estimate that more closely reflects current economic conditions.

Full-Scope Review: A full-scope review is accomplished when examiners complete all applicable interagency examination procedures for an assessment area. Performance under applicable tests is analyzed considering performance context, quantitative factors (e.g., geographic distribution, borrower profile, and total number and dollar amount of investments), and qualitative factors (e.g., innovativeness, complexity, and responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that do business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applicants; the amount of loan requested; and the disposition of the application (approved, denied, and withdrawn).

Home Mortgage Loans: Includes closed-end mortgage loans or open-end line of credits as defined in the HMDA regulation that are not an excluded transaction per the HMDA regulation.

Housing Unit: Includes a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied as separate living quarters.

Limited-Scope Review: A limited-scope review is accomplished when examiners do not complete all applicable interagency examination procedures for an assessment area.

Performance under applicable tests is often analyzed using only quantitative factors (e.g., geographic distribution, borrower profile, total number and dollar amount of investments, and branch distribution).

Low-Income: Individual income that is less than 50 percent of the area median income, or a median family income that is less than 50 percent in the case of a geography.

Low Income Housing Tax Credit: The Low-Income Housing Tax Credit Program is a housing program contained within the Internal Revenue Code of 1986, as amended. It is administered by the U.S. Department of the Treasury and the Internal Revenue Service. The U.S. Treasury Department distributes low-income housing tax credits to housing credit agencies through the Internal Revenue Service. The housing agencies allocate tax credits on a competitive basis.

Developers who acquire, rehabilitate, or construct low-income rental housing may keep their tax credits. Or, they may sell them to corporations or investor groups, who, as owners of these properties, will be able to reduce their own federal tax payments. The credit can be claimed annually for ten consecutive years. For a project to be eligible, the developer must set aside a specific percentage of units for occupancy by low-income residents. The set-aside requirement remains throughout the compliance period, usually 30 years.

Market Share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Median Income: The median income divides the income distribution into two equal parts, one having incomes above the median and other having incomes below the median.

Metropolitan Division (MD): A county or group of counties within a CBSA that contain(s) an urbanized area with a population of at least 2.5 million. A MD is one or more main/secondary counties representing an employment center or centers, plus adjacent counties associated with the main/secondary county or counties through commuting ties.

Metropolitan Statistical Area (MSA): CBSA associated with at least one urbanized area having a population of at least 50,000. The MSA comprises the central county or counties or equivalent entities containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county or counties as measured through commuting.

Middle-Income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 and less than 120 percent in the case of a geography.

Moderate-Income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 and less than 80 percent in the case of a geography.

Multi-family: Refers to a residential structure that contains five or more units.

Nonmetropolitan Area (also known as **non-MSA**): All areas outside of metropolitan areas. The definition of nonmetropolitan area is not consistent with the definition of rural areas. Urban and rural classifications cut across the other hierarchies. For example, there is generally urban and rural territory within metropolitan and nonmetropolitan areas.

Owner-Occupied Units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified Investment: A lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rated Area: A rated area is a state or multistate metropolitan area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multistate metropolitan area, the institution will receive a rating for the multistate metropolitan area.

Rural Area: Territories, populations, and housing units that are not classified as urban.

Small Business Investment Company (SBIC): SBICs are privately-owned investment companies which are licensed and regulated by the Small Business Administration (SBA). SBICs provide long-term loans and/or venture capital to small firms. Because money for venture or risk investments is difficult for small firms to obtain, SBA provides assistance to SBICs to stimulate and supplement the flow of private equity and long-term loan funds to small companies. Venture capitalists participate in the SBIC program to supplement their own private capital with funds borrowed at favorable rates through SBA's guarantee of SBIC debentures. These SBIC debentures are then sold to private investors. An SBIC's success is linked to the growth and profitability of the companies that it finances. Therefore, some SBICs primarily assist businesses with significant growth potential, such as new firms in innovative industries. SBICs finance small firms by providing straight loans and/or equity-type investments. This kind of financing gives them partial ownership of those businesses and the possibility of sharing in the companies' profits as they grow and prosper.

Small Business Loan: A loan included in "loans to small businesses" as defined in the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of \$1 million or less and are either secured by nonfarm nonresidential properties or are classified as commercial and industrial loans.

Small Farm Loan: A loan included in "loans to small farms" as defined in the instructions for preparation of the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of \$500,000 or less and are either secured by farmland, including farm residential and other improvements, or are classified as loans to finance agricultural production and other loans to farmers.

Underserved Middle-Income Nonmetropolitan Geographies: A nonmetropolitan middle-income geography will be designated as underserved if it meets criteria for population size, density, and dispersion indicating the area's population is sufficiently small, thin, and distant from a population center that the tract is likely to have difficulty financing the fixed costs of meeting essential community needs.

Upper-Income: Individual income that is 120 percent or more of the area median income, or a median family income that is 120 percent or more in the case of a geography.

Urban Area: All territories, populations, and housing units in urbanized areas and in places of 2,500 or more persons outside urbanized areas. More specifically, "urban" consists of territory, persons, and housing units in places of 2,500 or more persons incorporated as cities, villages, boroughs (except in Alaska and New York), and towns (except in the New England states, New York, and Wisconsin).

"Urban" excludes the rural portions of "extended cities"; census designated place of 2,500 or more persons; and other territory, incorporated or unincorporated, including in urbanized areas.

Trust Service

IBC Trust service is a division of International Bank of Chicago. We have streamline services for administration, custodian and loan services on self-directed IRAs, especially on Real Estate IRAs. As your IRA custodian, our truly self-directed IRA services gives you complete control and flexibility since IRS does not allow you to personally administer your self-directed IRA account.

Online Banking

IBC offers customers online banking platform.

Mobile Banking

IBC offers customers mobile app, INBK Mobile to manage their finances.

Mobile Check Deposit

IBC customers can deposit checks right from their phone through INBK Mobile app.

Safe Deposit Boxes

Offered at Broadway and Des Plaines Branches.

Merchant Remote Deposit Capture

It allows customers to deposit a check at their desk tops with desk top scanner which connects to the PC and the internet to turn checks into digital deposits.

INSTITUTION RATING

INSTITUTION'S CRA RATING: This institution is rated **Satisfactory**.

An institution in this group has a satisfactory record of helping to meet the credit needs of its assessment area, including low- and moderate-income neighborhoods, in a manner consistent with its resources and capabilities.

The Lending Test is rated Satisfactory.

- The loan-to-deposit ratio is more than reasonable given the institution's size, financial condition, and assessment areas credit needs.
- A majority of home mortgage and small business loans are in the institution's assessment areas.
- The geographic distribution of home mortgage and small business loans reflects reasonable dispersion throughout the assessment areas.
- The distribution of borrowers reflects, given the demographics of the assessment areas, reasonable penetration among individuals of different income levels (including low- and moderate-income) and businesses of different sizes.
- The institution did not receive any CRA-related complaints since the prior evaluation; therefore, this factor did not affect the Lending Test rating.

The Community Development Test is rated Satisfactory.

- The institution's community development (CD) performance demonstrates adequate responsiveness to the CD needs in the assessment areas through CD loans, qualified investments, and CD services, as appropriate considering the institution's capacity and the need and availability of such opportunities for CD in the institution's assessment areas.

INSTITUTION RATING

INSTITUTION'S CRA RATING: This institution is rated Satisfactory.

The Lending Test is rated Satisfactory.

- The loan-to-deposit ratio is reasonable given the institution's size, financial condition, and assessment area credit needs.
- The bank made a majority of home mortgage and small business loans by number outside of its AAs. By dollar volume, the bank made a majority of home mortgage loans outside its AAs and a majority of small business loans inside its AAs.
- The geographic distribution of loans reflects reasonable dispersion throughout the assessment areas.
- The distribution of loans to borrowers reflects, given the demographics of the assessment areas, reasonable penetration among individuals of different income levels (including low- and moderate-income) and businesses of different sizes.
- The institution did not receive any CRA-related complaints since the previous evaluation; therefore, this factor did not affect the Lending Test rating.

The Community Development Test is rated Satisfactory.

- The institution demonstrated adequate responsiveness to the community development of its assessment areas through community development loans, qualified investments, and community development services, as appropriate. Examiners considered the institution's capacity and the need and availability of such opportunities for community development in the assessment areas.
